Vulvovaginitis, a general term referring to many types of vaginal infection, is the most common gynecologic condition seen by practitioners rendering primary care to women. Discharge, burning, and pruritus are the most common symptoms, accompanied by signs of vulvar irritation, such as erythema and excoriation of the vulvar skin.

Vulvovaginitis: Practice Essentials, Background, Anatomy
Placenta previa is an obstetric complication that classically presents as painless vaginal bleeding in the third trimester secondary to an abnormal placenta near or covering the internal cervical os. However, with the technologic advances in ultrasonography, the diagnosis of placenta previa is commonly made earlier in pregnancy.
